## From the Principal's Desk...

"Education is not merely the acquisition of facts,  
but the rigorous training of the mind to think  
critically and creatively."

Albert Einstein

Dear students

Esteemed Parents, Dedicated Faculty, and Cherished Students, It is with immense pleasure and profound honour that I extend a warm welcome to Government College Nagrota Bagwan. As Principal, I consider it a distinct privilege to lead an institution where the pursuit of knowledge is a shared journey, and each day presents a valuable opportunity for intellectual growth and discovery. We envision ourselves as a vibrant community of learners, where the spirit of inquiry permeates every interaction, fostering continuous development not only among our students but also within our esteemed faculty, engaged parents, and dedicated staff. At the heart of our educational philosophy lies an unwavering commitment to maintaining exceptional standards of teaching. We relentlessly strive to understand and enhance the educational process through collaborative team strategies, always placing the holistic achievement and well-being of our students at the forefront of our endeavors. Our dedicated educators skillfully employ two complementary yet powerful approaches – Love and Logic – to cultivate a nurturing and empowering learning environment for all our students. This synergistic strategy recognizes that while genuine care and affection build trusting relationships, fostering a sense of respect and appreciation, the application of sound reasoning cultivates essential life skills. Through Logic, we aim to develop in our students a strong sense of personal responsibility, robust self-control, astute decision-making capabilities, unwavering self-confidence, and the formation of a character grounded in high moral values. We firmly believe that meaningful student learning is deeply intertwined with a robust and effective partnership between home and college. The stronger this alliance, the greater the positive impact on our students' academic and personal development. Recognizing the inherently social nature of learning, we wholeheartedly encourage students to engage with us directly for a more comprehensive understanding of their progress and opportunities. I eagerly anticipate a fruitful collaboration with each member of our college community. We maintain an open-door policy for parents, ensuring they feel welcome to connect with us at any time. Our commitment is to create an environment where students are actively engaged in meaningful and enriching learning experiences, and where the invaluable contributions of our staff members are consistently recognized and deeply appreciated.

## **Coordinator's Message**

### **Department of Business Administration**

Dear Students

Science and civilisation have made rapid strides especially in recent times and as a result, the world has gone a transformation. But behind all the progress of mankind is the human factor, the human capital – the skills, education and experience which are invaluable and irreplaceable. Several studies into economic growth in advanced countries have confirmed the importance of investment in human capital.

A country's physical capital is of course important ----- natural resources, minerals, dams, forests and industrial establishment. But about three fourths of the income even of advanced countries comes from human skills and the ability of the people, not from land, property rights and other permanent assets. Man exploits these assets through his capacity to create wealth and it is the capacity that makes all the difference between a rich, prosperous and progressive country and a poor and backward one.

India is rich and yet it is poor. It is rich in natural resources, mineral wealth, varied assets, rivers, forests, etc. It has a massive population also. There are lakhs of skilled workers too, but they constitute a small minority. There is no dearth of human capital in this country. As a result of the inadequate utilization of human resources, there is unemployment, illiteracy, malnutrition and poverty. Therefore, the human factor needs to be closely studied in relation to India. Mere numbers contribute very little to real human capital. It is education and training that count. Similarly, expenditure on education and training and improvement of health and research needs to be increased.

It is not only the inadequacy of attention and expenditure on developing human capital that needs to be remedied but it is the all-round development of the human personality, through sustained and concerted efforts that can help ensure the country's salvation. Mahatma Gandhi has said: "There are no two opinions about the fact that intellect rather than riches will lead. Character will count at the crucial time.

I welcome you in the portals of this institution.
